The Revenue Blil The Republican Sonatorial caucus has question has been earnestly discussed This scens to have been the only feasible course under the circum dut recorded at the polls in the last two ladding to it elections. But the Republicans are not in control and more than that, hame the Government with revenue lo go would involve the labor of months hence erations and patriotically met, the emergency with emergency legislation

The bill passed by the House will yield one \$40 000 000 annually in revenue and at the same time stimumle certain important industries. There is no ques ion that the bill will very histerfally tend to improve the lastness tonditions of the country - The R publicines of the s nate having now decided to report the measure withou amendment it will A probably come up for consider it on the list of this wick or the first of next The fact hat Senator Jenes of Navada ho has pined the Populists will acr with the kepublicans in support of this i venue mensure affrads ground for be to pass it in the Senate even if the Democontracte soldly against it. Luder the circumstances (is difficult to understand how the President could justify a velobut if he does privit the inictment of this relif agislation the Democratic party will have to itswer for haccurse to the people in the coming carryings.

The Free Silver Bill

The Scoutt France Committee his substitut da bill for the free comage of alverfer the bond bill passed by the House and reported the same to the Secure There seems to be little doubt that the substitute will ju a the Schate when it comes to a vote. But the free fiver programmic could be sen tracked if a few Democratic Strators would unite with the se find money Republicans in the Senate. Such a course, however is not among the possibilities as the Democrats dever hie those partisan fol as although they frequencly make this denor d of the happibleaus. When the Sherman selver has was under consideration had the Lapublicans comfated the Democratik compile and placed party considerations above state-man by Teacquest of the President for the regual of this law would have come to naught but while the kepublicine did not yany means at epaths theories of the Administration as to the effects of the law they give the per sarry vote ter its regial. There a no fear how ever felt many part of the country ove the action of the Sentit - The House has a sub-tint at f-pible in majority and extreme know that that majority stands as an untreguable bira tyork to two n he pe plean la debte thurrency

The I resident has been frightened out of his intended bargin with the bank cis As a candidate for abother term he del not like the universal scowl with which his extraordinary dicher with Morgan was regarded. But whether he has been frightened into a gunume or only a sham submission to the public seems doubtful. His indiscrect friend, Mr Putterson of lannessee, the most ioyal of the cuckoos says that it is only a sham I don't thick, says Mr Patterson 'that a popular loan is practice ble—the President's course in ordering one is wise, however, since it will relieve the Administration from criticism Ultimately the syndicate will get the bonds. This means that, in Mr Patterson opinion, which is taken from Mr Carlisle's opinion, which is taken from the President's opinion, which is taken from the opinion of Banker Morgan and I awter Stetson, the operations of the Morgan syndicate in fastening its cintches on all the free gold in sight have gone so far and have frightened

pont Morgan has succeeded by the in-timation of his wealth and his supposed relations with Government officials in compelling the people of this country to pay millions more for a supply of gold than they would have had to pay other-wise, we do not hesitate to say that he is conducting a business which is outrageous and ogainst public policy. The blame that attaches to him, however, is small in comparison with that which attaches to Grover Cleveland and John G. Carlisle, with whose countenance and assumed support he has acted. We do not agree with Mr. Pasterson about the failure of this loan, Morgan or no Morgan. We think it will succeed.

The bond that is being offered is a fairly year 4 per cent. investment. It is notes that second week in December, and until the "war message" appeared, at 120, a rate that yielded to the investor less than three per cent. interest. It is the safest investment for seitle decided to the investor less than three per cent. interest. It is the safest investment in the world. When a safe the per cent. interest. It is the safest investment in the world. When a safe they have a safe that they may appear at a court of the safe that the safe th investment in the world. Even now, since the war scare, and since the fact became known that another hundred

millions of these bonds were to be issued, they are selling at a premotum of seven they are selling at a premium of seven-teen crate on the dollar. The Gover-ment but only has the security, but the people have the money I is it forgotten that when the last ropalar loan was of-fered, amounting to \$50,000,000, bids were received for \$175,000,000? That was only fourteen months ago, and it elicited from this same Secretary of the Transuty, who new, in the interest of his banking friends, suffers doubt to be thrown upon the willingness of the public to take this how issue, the report to Cong ess that "a 25, per cent bond hav-ing a reasonable time to run could prob-

ably bawe been sold at par " decided to have the House revenue bill treported without amendment the time facilitie material of the Morgan syndicate. He was spenking in the interest of the people, and he was right. And what of making the measure more protective | was true then is equally true now. These sidered, but it was finally agreed to have their authorized brokers and will be the bill reported back to the Senate in taken at a high premium. And that is just the form in which it came from the really the most sinister feature of the whole business For it shows that, with tanc . Had the Republicans been in money and paying interest, we should full control at Washington the existing be raising revenue in the regular, ordertariff bill would have been revised in de- ly way, meeting our obligations as they tail in accordance with the popular ver- come due and reducing our debt, not

Nature works as hard as she can, but there are some things she cannot stand. If a man gets some foreign substance into the works of his watch, he doesn't expect the watch to run until the impediment is removed. His own digestive agatem is a much more wonderful and delicate mechan-

waten to run and the impediment is removed. His own digestive system is a much more wonderful and delicate mechanism than that of his watch, and yet he neglects it and abuses it. He lets it get out of order, and refuses to help it. In the end his neglect reacts with terrible force upon himself. The reaction comes on gradually, however, so that sometimes he secreely suspects the cause.

The cause of nine-tenths of the sickness of the world is constipation—a condition as common that four people out of five take it as a matter of course. From this one cause come indigestion; disorders of the stomach, liver and kidneys; billiousness, hendaches, flattlence, heartburn, impurity of the blood and the serious complications that follow. To begin with, constipation is a little thing, and a little thing will cause it. Dr. Pierce's Pleasand Felica are tiny, sugar-coated granules. They give to mature just the little help she needs. They are as gentle as they are efficient, and will perfectly cure the worst cases of constipation. There is nothing in the world like them, so there can be nothing 'just as good." The druggist who tries to sell you something else has his own interest in view and not yours.

The next day comes Simon with a bay of £600, which he tells over with in of £600, which he talls over with infinite care, graning and mopping his eyes betwitt each four or fivelpietes with almost rueful visage, so that it seemed he was weeping over this great expenditure, and then he goes to prepare the court and get serving against holl's arrival. Then, by the end of the week; being furnished with suitable alothing and entipment. Moli and Dou Shuehez declares it can mime the amounts that were paid.

It is admitted that the mayor, city engineer and the city electrician had employment with the company in various capacities and a member of the council has the contract for brilding the power house. The contract pries for the water and light plant was \$85,000 and \$63,000 at the sum has already been paid and the work is still in its latincy. Treasurer Caylord of the company declares there is in of soundstos for the charges but her admits that Mayor Armstrong was employed upon the work. He says that latinstrong upon the different position and the going applied for a position and the company mide him foreas at \$65 per week and Coinciliats Giore received the contract for the down.

That has to be proved Mr. Stew-ard, "says' I sevelsy "for you must adout that up to this present the has had no reason to love you, seeing that, had her fate been left in your hands, ale would now be in Barbury and Ilke to end her days there. Despite his natural infirmities Simon delivered this astonishing rhapsody with a pertain sort of vehemence that made it eloquent, and indeed, strange as his passion was, I could not deny that it was as reasonable in its way as any no-bler act of self sucrifice. "I begin to understand you, Mr. Stew

Tuesday, to a Kennebec Journal reporter The results which have been utlained In this State have been really beyond anything we had unticipated, and it is meeting with the cultre approval of the toachers. The system was formulated by Dr.

W. T. Harris, United States coumls sioner of education, who prepared quite s number of books used in the course, and edited many others. Dr. Harris' wide experience has given him a thor ough information on the subject of teachers' education, which is no small factor in the success of the movement It is being generally adopted officially in the different States, and is everywhere meeting with good success.

The movement has been in operation only since November, and I am informed that already between 500 and 600 trachers have joined the branch and ore taking the prescribed reading, reaping both pleasure and benefit from the work.

President's Report.

For the members of the Homane Society:

The work of the society has been more extended than in previous years. We have attended to nearly one hundred cases and calls, mostly in towne outside of the city. It is difficult to make people in the country towns comprehend that it is their duty to see that animals and children are protected from abuse. The law makes it obligatory on constables and selectmen of towns to attend to all causes of crueity which are brought before them. Three-fourths of the complaints brought to our notice are from country towns.

The town officers could attend to these cases with little delay and no expense while we are obliged to sead an agent which involves time and considerable expenses. It is to be hoped that the humse people in the town will attend to these cases in the future. The late John F. Colby who took great inversat in the society bequeathed two brindred dollars as a permanent fund, and we trust it will be increased by other friends of the society. It would greatly encourage the officers of the society in this work if a larger number of those persons who are interested in it would attend the annual meeting. An attendance of conj four or five persons be very discouraging.

to serve during the coming year.

A new dread of a broader character was adopted.

It was voted to elect a descon in place of the late Deacon J. S. Whealwright, the election to occur in a short time Plans for evangeliatic work were made

the subject of some remarks by Rev. Mr. Penman, who was heard with much interest. And there was a discussion upon plans for prayer meetings and fellowpanistor prayer meetings and relow-ship. Quite a number of those present particitated in the discussions which broughs out many good ideas Dr. Field after his remarks upon the topic given above read a number of let-

ters from members who are in other places and other fands, or who were anable to be present.

Prof. J. S Sewall, of the Theological

Seminary, made some feeling remarks regarding the love and esteem felt in this city for Rev. Mr. Penman and wife, the appreciation of their labors and the pleasure of the church at having them with them. Rev. Mr. Penman made an appropriate

esponse to the words of Prof. Sewall. A rising vote of thanks was given the ctiring clerk, George S. Hull. The church contributions during the

Assigness Appointed by Judge of the Maine Pomological Society and Agricultural Society at and Agricultural Society at Presque isle.

The delegation is the union winter meeting of the Maine Pomological Society at Signess of the Shaw & Moree Lumber meeting of the Maine Pomological Society. efety and Maine Agricultural Society at Presque Isle arrived there during the cold snap but their welcome by the

towns people was a warm one.
The assemblage was a loyal one and the local attendance was encouragingly large. On the train arriving Tuesday afternoon were Prof. F, L. Harvey, o the Maine State College, a devoted scientist and an authority on all the pernicious bugs that are bothering its farmers; President John W. True, or

the society; Treasurer Charles E. Wheeler, Willis A. Luce, of Union, one of the leading Maine of chardists; Secre-tary D. H. Knowlton, whom every Maine former knows, and many others. Committees were at the station, and all the visitors were comfortably tucked avay in warm corners.

The meetings commenced at 11 A M. in Academy Hall, the first session being a business meeting, at which reports were presented. Secretary Knowlton's report was purely informal. Later in the meeting he will be heard from again on the question of judging, and he has some striking points for the society's consideration The treasurer's report, presented by Treasurer Chas. E. Wheeler, of Chester-

ville, Wednesday forenoon, showed that for the first time in its history the society is ahead of its liabilities, and the occa sion was marked by hearty applause. The permanent fund will now be kep intact.

Association and substituting in its stead a purely cycling meet in the spring of each year.

The idea is not in any way to conflict with the jurisdiction now exercised by the L. A. W. over this sport, but rather to make it more of a feature in interception. It is unfortunate that in the past the one cycling event at the championahip meet should have proven the fizzie that it really has by the omnipresent accident.

Rarely has the event been won in fast time, or by the best man in the field, he generally being in the tumble, if there was one.

Then again, cycle racing as exemplified at these meets has been anything but interesting, and consequently the sport, has suffered greatly.

But the colleges, as a whole, recoguizing the true value of the sport, are anyious to hold an intercollegiate cycling tournamient, and that it is a thing of the near future is shown by the fact that TWO ATTRACTIVE OLD WORLD TOURS
